HR Candidate Evaluation: Junior Power BI Developer

Candidate Summary

Carlos is a strong Junior Power BI Developer candidate with solid practical foundations across data modeling, transformation, querying, and reporting. Throughout the technical evaluation, he demonstrated clear analytical reasoning, familiarity with agile collaboration patterns, and a hands-on approach to building and troubleshooting Power BI solutions.

Technical Skills Evaluation

Job Description Requirement	Score	Evaluation Argument (Based on Interview)
Perform data validation, cleansing, and quality checks	Experienced	Carlos detailed extensive ETL experience using Power Query, including resolving date format inconsistencies (US vs MX formats), handling nulls, type conversions, and using conditional logic for data cleansing.
Basic knowledge of DAX (Data Analysis Expressions)	Proficient	Carlos correctly identified the difference between Calculated Columns and Measures based on filter context. He also accurately structured a CALCULATE function to filter sales specifically for the electronic category.

Job Description Requirement	Score	Evaluation Argument (Based on Interview)
Understanding of data modeling concepts and relational databases	Experienced	Carlos articulated a strong understanding of Star and Snowflake schemas. He effectively described separating fact tables (e.g., surveys or sales facts) from dimension tables (e.g., regions, users) using primary and foreign keys.
Experience working with SQL for data querying	Experienced	Carlos provided a precise and accurate SQL query to calculate total sales by region, perfectly incorporating the SELECT, SUM, FROM, GROUP BY, and ORDER BY clauses.
Assist with troubleshooting report issues and optimizing dashboard performance	Experienced	To optimize a slow dashboard, Carlos correctly proposed using the Performance Analyzer, reviewing DAX query efficiency, optimizing Power Query steps, and evaluating the underlying data model architecture.
Exposure to Agile development methodologies	Experienced	Carlos demonstrated significant Agile experience, referencing standard ceremonies like Dailies, Sprint Planning, and Retrospectives, as well as

Job Description Requirement	Score	Evaluation Argument (Based on Interview)
		using Jira and working within SAFe and Scrum frameworks.

Final Recommendation

Final Recommendation: Hire Recommended. Carlos demonstrates a strong understanding of SQL, Data Modeling, and Power BI performance optimization, making him highly capable for this role.
